

Dr. Chris Edwards Makes Green News!

We are happy to report that Space Coast Business magazine put out a special environmental edition in this month's magazine (March 2008). On the cover is headlined, **Brevard Businesses going Green**. The feature story on page 26, **Building Green: the right thing to do**, leads the story with Dr. Edwards. He tells of his dream to build a state-of-the-art sustainable Dental Practice and office center focused on improving environmental performance. Things have picked up speed and the new home of Smile Design Center should be completed in the fall.

Pick up your copy of Space Coast Business and read all about it.
